

Countering Bias in Personalized Rankings : From Data Engineering to Algorithm Development

Team Details-

Bishnu Kashyap (M20AIE227)

Sri Rama Sasi Teja Bhattiprolu (M20AIE309)

Perspectives impacted by bias

How Biases can influence **economy**

- Loan recommender systems are designed to assist **lenders** in looking for promising **borrowers**
- Such systems model lenders' historical behaviors and generate **personalized recommendations**
- Certain **geographical regions** such as Asia and Africa **dominate recommendation**
- Others like Oceania and Eastern Europe **barely receive** recommendations

Biases that Impact on LAW

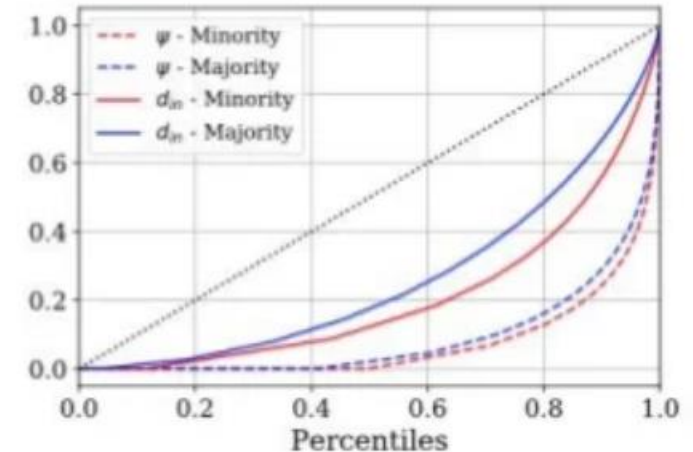

The right to non-discrimination, which can be undermined by inherent biases, is embedded in the normative framework of the **European Union**, e.g.:

- Mentions can be found in Art. 21 of the EU Charter of Fundamental Rights
- Article 14 of the European Convention on Human Rights
- Articles 18-25 of the Treaty on the Functioning of the European Union

Biases associated with social dynamics

- **People recommendation** in social networks, with users divided into groups based on gender
- A range of **state-of-the-art algorithms**, such as Adamic-Adar, SALSA, and ALS are inspected
- People recommenders produce disparate visibility on the two subgroups of gender
- **Homophily** plays a key role in **promoting or reducing** visibility for different subgroups

Lorenz Curves (inequality). Recommendations introduce more inequality than degree distribution, and this inequality is stronger in the minority class.

Ethical aspects influenced by Biases

Moral

recommendation of
inappropriate content

Privacy

unauthorised data collection, data
leaks, unauthorised inferences

Autonomy and Identity

behavioural traps and encroachment
on sense of personal autonomy

Opacity

black-box algorithms, uninformative
explanations, feedback effects

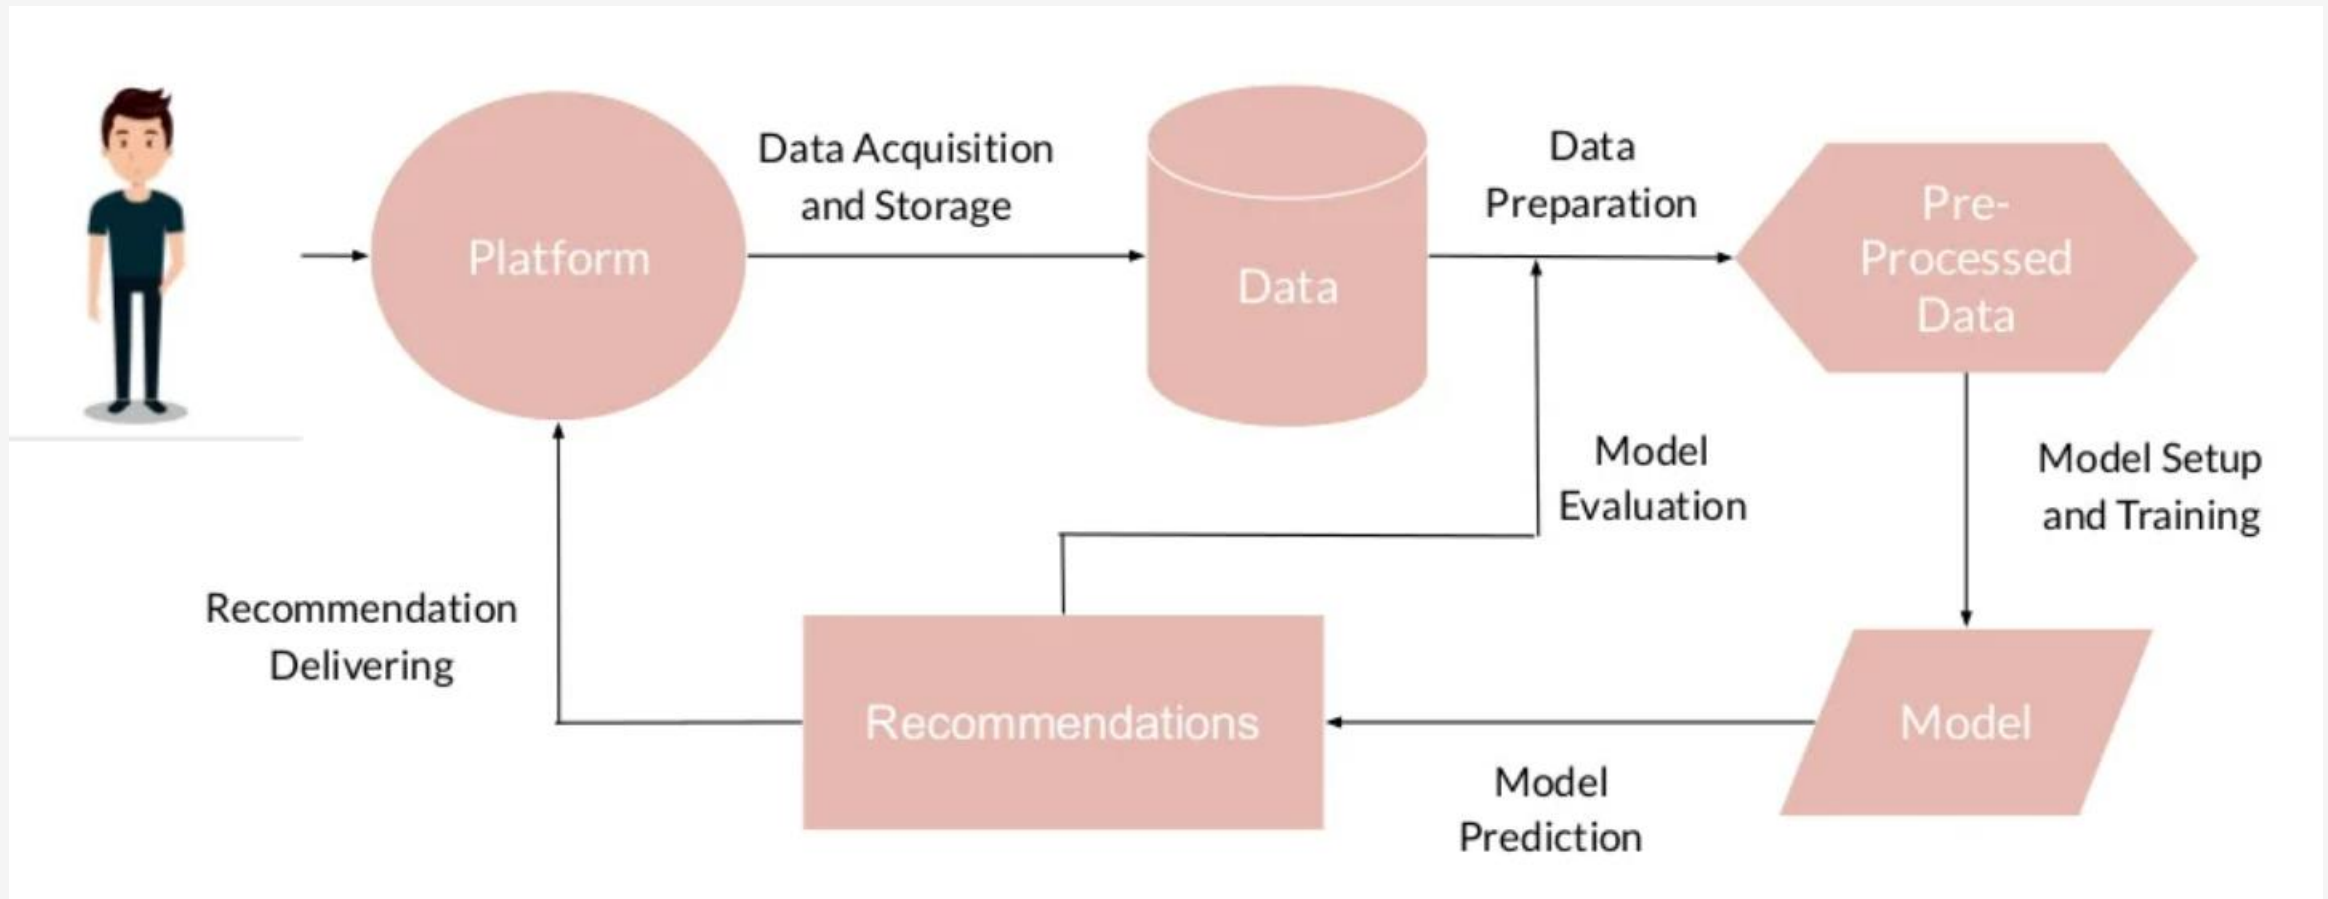

Fairness

observation bias,
population imbalance

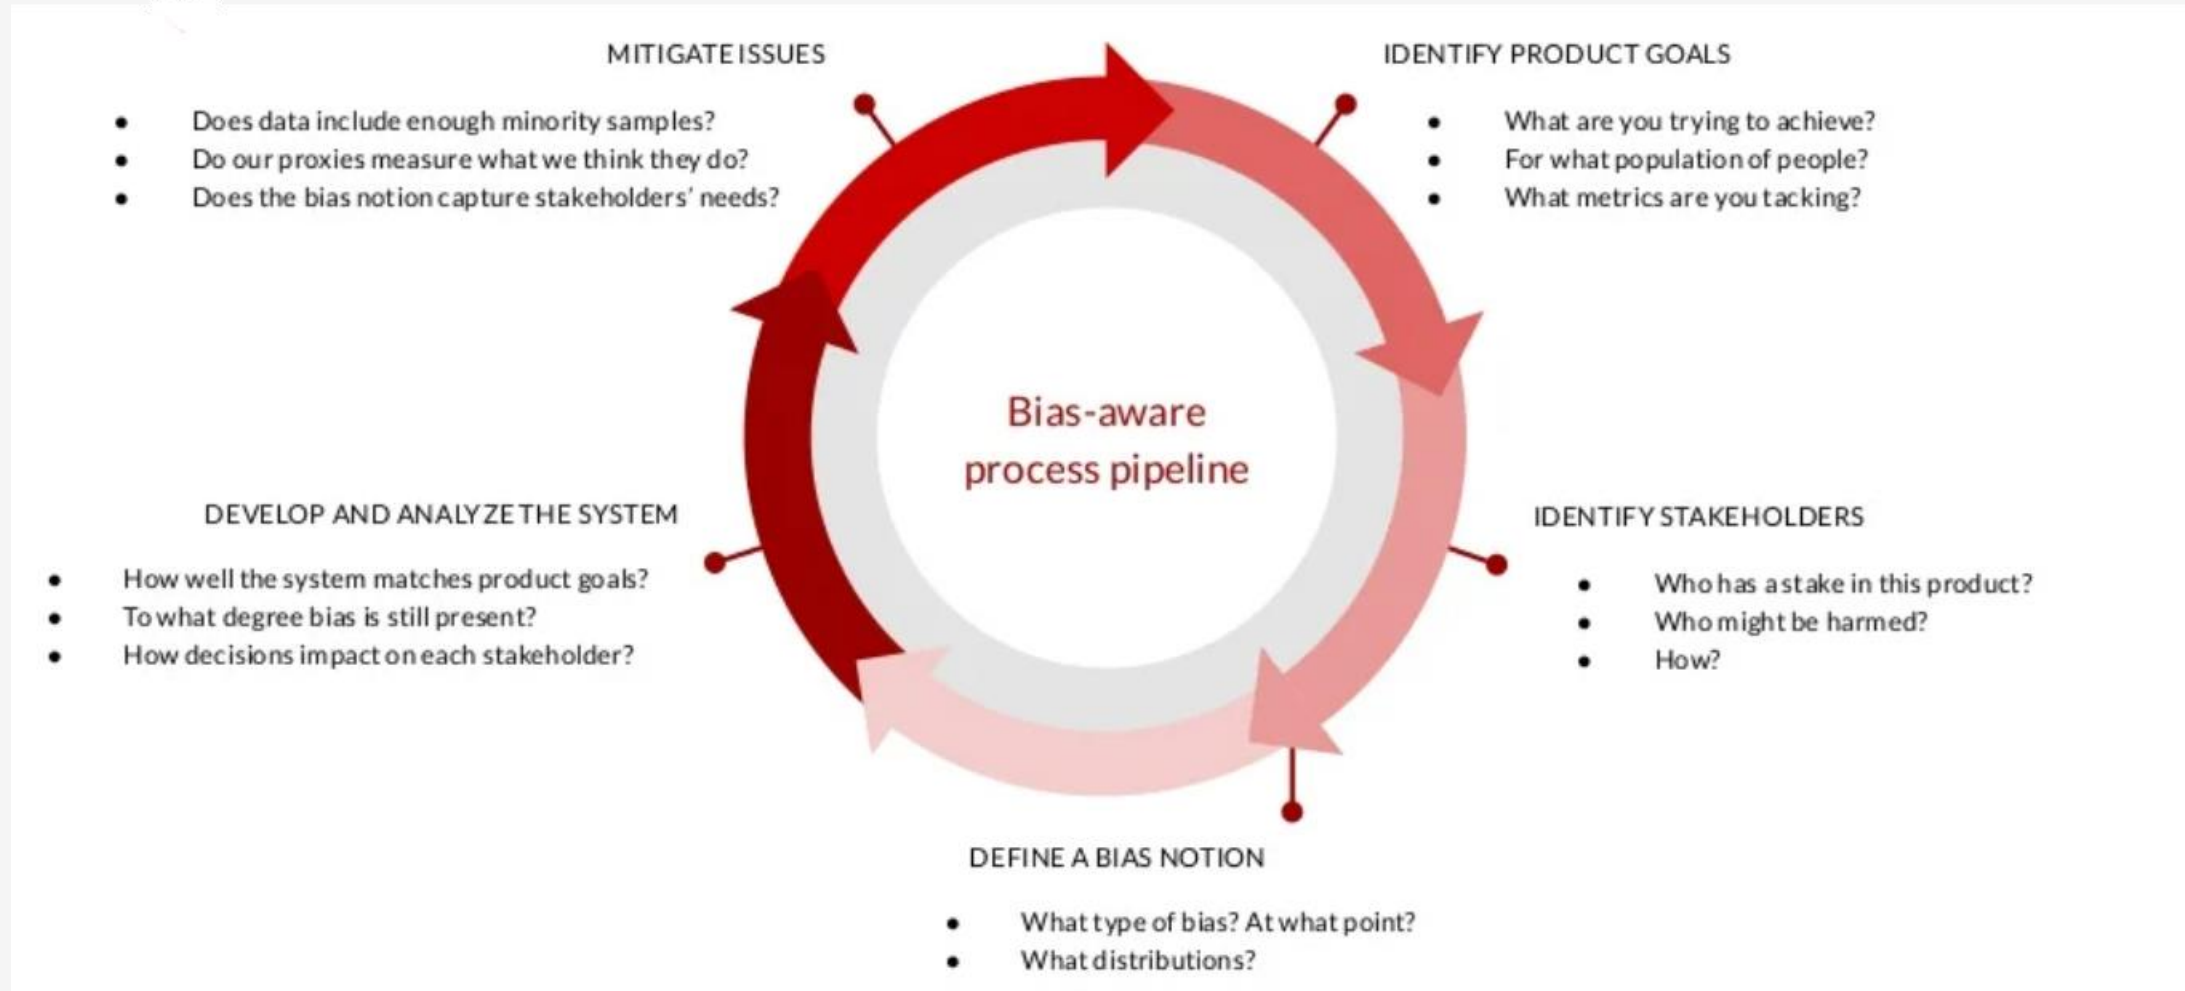

Social Exposure

lack of exposure to contrasting
viewpoints, feedback effects

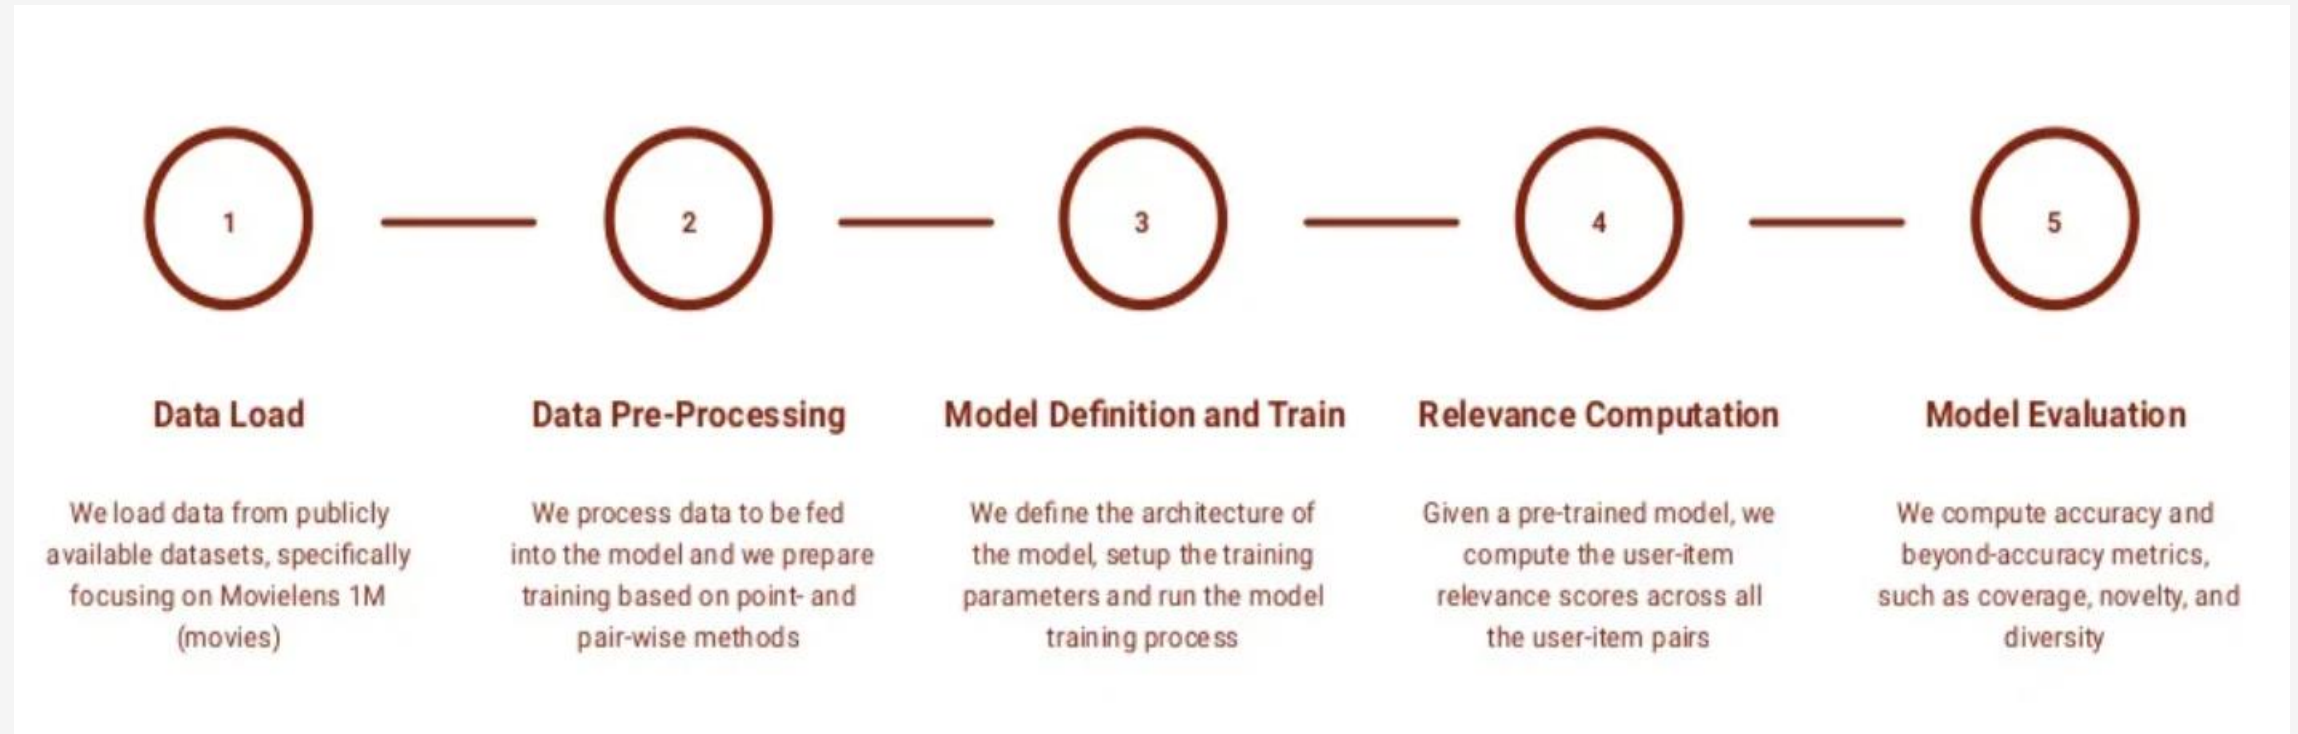

Recommendation pipeline

Bias-aware process pipeline

Steps of this Hands-on

Code are added in Git-hub Repo: <https://github.com/bkkinfo/Countering-Bias-in-Personalized-Rankings>

Thank You!
